

Our new focus: the children

The great success of our prenatal check-ups has encouraged families to ask us about preventive care for their children.

In addition to midwife examinations and the national vaccination program, we have introduced the German child health record adapted to exclude what is not feasible in Madagascar. At the same time, we have added important elements, such as postnatal midwife check-ups, dental check-ups, and hospital stays.

We also offer a pediatric consultation and, when necessary, inpatient treatment. Children with developmental delays are enrolled in our Milk and Healthy Eating Program and receive occupational therapy if needed. Due to extreme poverty and the daily struggle for basic needs like food, children are often left to fend for themselves, with little opportunity for proper education and upbringing. From an early age, we welcome them into our toddler groups and later into our Kids Clubs. Our new MHM garden is another space where even young children can start learning.

We step in where families are unable to fulfill their responsibilities toward their children.

Our wish is to see healthy five-year-old children!

We are committed to nutrition, age-appropriate development of gross and fine motor skills, and language!

All of this should be a normal part of life for our children too!

You can help too!

Donate

- A full treatment, including all necessary care, costs around **3,50 Euro**
- A C-section often means saving a life and costs **250 Euro**
- Sponsorships can support pregnant women: **25 Euro per month for 10 months**
- With **25 Euro per month**, a child can attend school
- Perhaps you'd like to help as a volunteer, either on-site in Madagascar or in Germany

Many small people, in many small places, taking many small steps can change the face of the world.

- African proverb

Our Vision

Madagascar is one of the most beautiful yet also one of the poorest countries on Earth. Not only is medical care urgently in need of improvement, but this is where we focus our efforts and attention. Nearly half of the population is 15 years old or younger. Instead of despairing over this, we want to invest particularly in this group.

Out of Christian charity, we provide care to thousands of people in need through our hospital and mobile programs!

Preventive check-ups, timely treatments, skilled staff, quality equipment, and adequate medications these are luxuries that are unknown here, but we are determined to change that!

Our Goals

Our Social Media:

MHM in Ambovo:

AMBOVO, a small village northwest of the capital: here, Nehemia Christian Relief Organization e.V. established a health station, which we have taken over and expanded. Initially, there was only outpatient care; since 2019, we have also had inpatient beds and an operating room. We provide basic care in general and dental medicine, midwifery services, and a pediatric department. We handle emergencies, stabilize patients, and transfer them if necessary.

In addition to our focus on preventive care, which is yielding very good results, family planning is also a very important aspect.

The villagers from the surrounding area built the foundations of the hospital through volunteer work: it is their hospital, and they come to us with all their health concerns, personal issues, fates, and challenges because they know we will help.

FURTHER EDUCATION, EQUIPMENT & COLLABORATION

We place great value on knowledge and the materials necessary to make an organization and a hospital successful. Our staff continuously learns: improving their expertise, English, and Skills for Life! The missions of the *Pro-Interplast* e.V. teams, which take place twice a year, are a highlight. Many people receive surgeries they would otherwise have no chance of accessing due to logistical or financial barriers, surgeries that can change their lives! Together we are strong: wonderful programs are also running thanks to the support of the *Tulisa*, *Magdalena-Schneider*, and *Deichmann Foundations*.

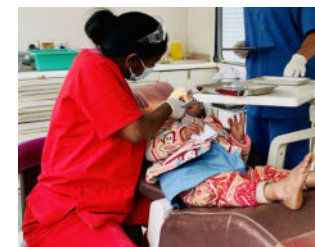

In Ambovo, we have our hospital, office, housekeeping, and technical services. Since 2025, we also have the Schlittenhardt Children's Paradise, and it serves as the starting point for our mobile missions, our influence extends far beyond the borders of Ambovo.

MHM Mobile Programs:

MIDWIFE MOBILE

The need in Madagascar is so great that newborns are abandoned at the landfill. This shocking realization motivated us in 2009 to establish the Midwife Mobile. We regularly provide nighttime care for homeless pregnant women, children, and sick adults in the poor neighborhoods of the capital. Our work has shown success: all our women have kept their children. Additionally, we travel weekly to remote bush regions that have no medical care. Four villages and one prison have benefited from our services for many years.

DENTAL MOBILE

Since 2012, mobile dental care has been part of our services. Our dental mobile serves the same villages as the Midwife Mobile, with a particular focus on children. We want to invest in the future. It's rare to see primary school children with healthy teeth.

AMBULANCE

We are very grateful to have two operational ambulances with sirens and flashing lights. In emergencies, they are a real help in transferring patients to the nearest hospital or bringing pregnant women in need from home and surrounding health stations to us.
